Hi, my name is Zachary Zufelt, and I'm the owner-operator of Royal Flush Plumbing and Heating. My company is a service plumbing company that has been in business for over 30 years.

Ever since our inception, we have always had issues rebuilding Symmons Valves. We've discovered that working on these valves are a piece of cake until you get to the hot and cold seats. After several years of wear-and-tear, the seats will seize in the chassis and become virtually impossible to remove with the current hand tools on the market. This is the problem that we've set out to solve.

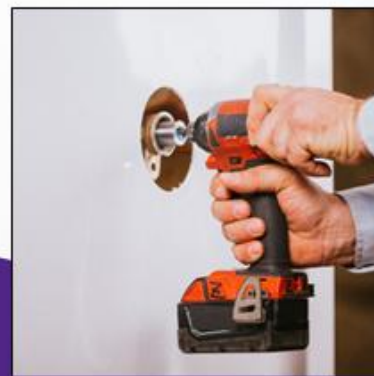

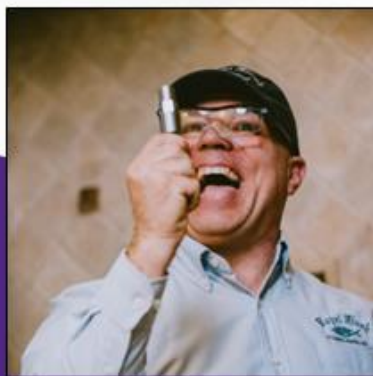

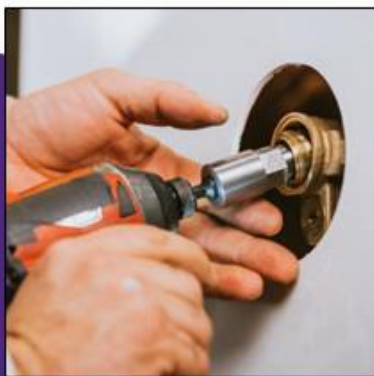

When I was younger, there was a tool my grandfather used to take out seized screws. It was a type of screwdriver that he would hit with a hammer, and each hit would slightly move the screw until it finally broke loose. I took this technique and theorized that it could work with an impact gun to remove seized seats. I designed a prototype, sent it off to a local machinist, and Shazam! I was off and running.

The first seats I replaced with the new tool were removed in seconds. Ever since that day, I have had the same results with every single seat, including seats that homeowners and previous plumbers have completely stripped. Although this tool was never designed to remove stripped seats, every single plumber, including myself, has been able to take out every stripped and seized seat we've come in contact with so far.

The tool is patent pending to date. As we started to build our website, some of our videos leaked out, and it has turned into multiple supply houses. Plumbers from all around the country, from California to Florida, and even as far as Canada, have contacted us to purchase the tool. If you ask 10 plumbers about Symmons valve rebuilds, all 10 will complain about the seat removal.

We are currently scheduling meetings with purchasing agents at supply companies. We look forward to speaking with you soon.

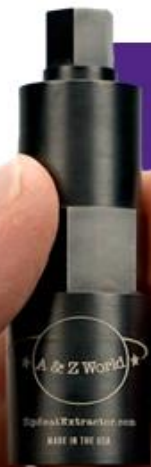

Thank you so much,

ZIP SEAT EXTRACTOR

Power Wrench for the Symmons Temptrol Valve

NO MORE STRIPPED SEATS

- Major leap forward from a hand tool to a power tool!
- Removes seats without stripping!
- **Pays for itself** the first time a replacement becomes a rebuild!
- Lifetime warranty!

**COMING SOON:
UNIVERSAL EXTRACTOR**

EASY, QUICK, AND RELIABLE REBUILDS!

The Universal Extractor brings the ease, speed, and reliability of a power tool to practically any fixture with a seat, including most popular brands and applications. The Universal Zip Seat Extractor can service commercial kitchen sinks, outdoor faucets, 2 and 3 handle tub and shower valves, and much, much more. Coming in 2023!

- Residential Plumbers
- Property Managers
- Facilities Maintenance
- Hotel and Hospitality
- Gyms and sport facilities
- Corporate offices
- Commercial accounts

PARADIGM SHIFT

Own the 1st power tool
for Symmons Temptrol
tub & shower valve
repairs & rebuilds!

For over 80 years, the Symmons Temptrol tub & shower valves have been the preferred tub & shower valves. This is because of their ease of installation, professional grade design, and most importantly, because this valve can be repaired and rebuilt from the face without the need to cut open walls and replace the valve like most others.

However, there is a challenge everyone runs into: After years of use, the seats can become calcified and hard to remove, leading to stripped seats when using the current tools available today. This requires replacement of the entire valve instead of a rebuild. Zach Zufelt, a master plumber for over 30 years, has invented a solution to this common problem: The Zip Seat Extractor Power Wrench.

“When a shower valve is stripped, it could turn a one-hour job into several days if the wall needs to be cut open. These jobs were unpredictable! The Zip Seat Extractor Power Wrench is a major leap forward, from a hand tool to a power tool. It works on any impact driver, drill, or screw gun. Although the tool wasn't designed for it, we've even been able to remove stripped strips!

The Zip Seat Extractor has been field tested on hundreds of valves with a 100% success rate.

About A&Z World, LLC:

We offer creative solutions for today's challenges. Each tool design is intended to solve common problems not addressed by products currently on the market. Our goal is to save real people time, money, and stress by creating tools that are powerful, reliable, and easy to use.

WRENCH DESIGNS

Evolve

Hexagon for current valve models

Classic

Square key for legacy valve models

HIGH COMPATIBILITY

1/4" socket adapter for use in any impact driver, screw gun, or power drill

HOT & COLD SEATS

IMPORTANT FEATURES

2-in-1 design for fast service

Light and compact
1" x 2.75" x 1"
153 kg (5.4 oz)

Materials:
Hardened Steel
Black Oxide coating

Patent pending

The only dual-action powered seat removal wrench on the market!
